

HW1: Data Wrangling

2019/9/17

- 1. Install python3, jupyter, pandas, numpy, etc...
- 2. Prepare your own transcript **HTML** file (or using the given file)
- 3. Scrap data from the webpage and transform to a **csv** file
- 4. Using pandas to clean, enrich, validate your transcript data
- 5. Calculate your scores using the given **from_ap_to_score** function
- 6. Calculate your average achievement point and average score as we have done in class
- 7. Submit your **HTML** file, **csv** file, **jupyter** file for this homework.
- **Note:** It is a simple homework for you to familiar with jupyter, pandas and data wrangling. We will provide solutions thus **NO bonus point**.
